

NORMECA Emergency Floating Hospitals

Experience with medical catamarans

Mobile catamarans are available for use following disasters across the world. These are customizable and can be developed for securely housing doctors and/or patients. One model, the NorCat Floating Hospital, is fully equipped as a functional hospital. With its shallow draught it is well suited for use in all types of navigable waterways.

The catamarans can include a helicopter pad landing platform and a landing ramp for various types of vehicles. Medical modules, with all necessary specialty instruments, can be customized for specific specialties, including: general surgery, various categories of specialty surgery, ophthalmology, gynecology, and emergency triage.

Brondolo Associates can provide immediate information on these mobile hospitals and other services following a disaster. Please contact Tom Brondolo at 917-828-5980 for information.
